We are currently far away from the goal for 2030. Globally 3.9% of all children die before reaching the age of five, which means that on average 15,000 children die every day. 3. And the visualization shows that while the child mortality rate declined around the world there are still many countries in which the mortality rate is higher than 2.5%.

~~Child and Infant Mortality – Our World in Data~~

Third, children suffer and die because natural laws work in regular ways: the gravity that keeps us on planet Earth also enables fatal falls; the fire that warms also burns; the water in which we swim can also drown. Disease, sins, and consistent natural laws, then, are the main reasons that children die.
